Coast and Geodetic Cente-

In the coast and goester survey and celebrate, April the beginning of the freedom will be capted and freedom to the coast and goester survey and celebrate, April the beginning of the freedom will celebrate will celebrate will be a loading feature.

The government's oldest scientific butter that all the freedom will celebrate will celebrate will celebrate will be compared to the president will be compared to the president will be compared to the president soft the Clumbal Historical Society are as follows. All celebrate will be compared to the president of the will be for far to the president of the committee of the degradation with the president of the committee of the degradation of the survey were calablated by Thomas feroon in 1811 and a noted Navie will be first the president and the Sacratical Compared to the comp Jefferson in 1811 and a noted Swiss scientist, F. R. Hassler, was its first superintendent. Hassler was driven from his native country by the Swiss revelution, and for a time after his arrival in the new republic was professor of mathematics at West Point. The story of his life was one of untring quest for knowledge and indefatigable labors in its application. When twenty-one years of age, in co-operation with Tralles, one of the first mathematicians of the day, he began a geodetic survey of Switzerland, bearing the expense of the survey by himself at first until his work was recognized by the Helvetic government. It is an interesting coincidence that the inspiration of the most enlightened of our Presidents, Americans will recognize that its men and not its piles of store and brick constitute the real city; that even a higher obligation is due to the animate than to the inanimate Washington, to the men of the capital time to a composite picture of the ideal President, constructing it from the various characteristics of the different Presidents who in one way or another have done much for the uphulding of Washington.

That a great national university here has been the dream of many of the matterial Washington as to english the washington as to method and the National Capital.

be first to introduce the accuracy and

vey has carried its investigations along the coasts and adjacent waters, in every state and territory of the Union and in all the inland possessions under the United States flag except Guam and Samoa. Stations, at which components of the magnetic force have been observed, now number 5,600.

Dr. E. Lester Jones, present head of the survey, who is arranging the centennial celebration, plans to have the Swiss minister, Dr. Paul Ritter, take a prominent part in the exercises because of Hassler's connection with its early history.

Plans for the Celebration.

The celebration will open in the uditorium of the New National Museum, beginning at 2:30 o'clock in the afternoon of April 5. The speakers at that session will be Dr. Hugh M. Smith, United States commissioner of fisheries; Dr. Louis A. Bauer, director of the department of terrestrial mag-

isheries; Dr. Louis A. Bauer, director of the department of terrestrial magnetism, Carnegie Institution of Washington; Dr. S. W. Stratton, director of the bureau of standards; Rear Admiral J. E. Pillsbury, U. S. N., retired, and Dr. George Otis Smith, director of the geological survey.

There will be another session at the same place at 8 o'clock in the evening, those scheduled to speak then being Representative J. Hampton Moore, Brig. Gen. W. M. Black, chief of the Corps of Engineers, U. S. A.; George R. Putnam, commissioner of lighthouses; George Washington Littlehales, United States Navy hydrographic office.

The following day, at 2 p.m., Prof. William, Henry Burger, professor of civil engineering, Northwestern University, will speak, as also will Rear Admiral Richard Wainwright, U. S. N., retired; Dr. Otto Hilgard Tittmann,

Admiral Richard Wainwright, U. S. N., retired; Dr. Otto Hilgard Tittmann, president of the National Geographic Society and former superintendent of the coast survey; Dr. Charles Lane Poor, professor of celestial mechanics, Columbia University, and Dr. Douglas Wilson Johnson, associate professor of geology, Columbia University.

The centennial celebration will close with a banquet at the New Willard Hotel the night of April 6, at which the speakers will be President Wilson, Dr. Paul Ritter, minister of Switzerland; Secretary Daniels of the Navy Department Secretary Redfield of the Department of Commerce, Dr. Thomas Corwin Mendenhall, the oldest living ex-superintendent of the survey.

During the celebration there will be an interesting exhibition at the National Museum of the work of the survey and the instruments used.

The Long-Sought-For 'Balanced' Tires We have actually produced the longsought-for 'balanced' tires. The instant success of our popular priced 'Usco' Tread is a striking example of the automobile owners' immediate recognition of our 'balanced' tires. There are three big, exclusive reasons why the 'balanced' tire is the 100 per cent. efficient tire.

1 Because the rubber tread is 'balanced'—that is, the tread has just the exact 'balance' between resiliency and toughness, which produces the greatest possible efficiency in the whole tread.

2 Because the fabric carcass is 'balanced'—that is, the parcass has complete 'balance' between flexibility which gives easy riding, and strength which gives

3 Because the whole tire is 'balanced'-that is, the

rubber tread and fabric carcass are in such complete balance' as to give equal wear-both tread and carcass are equally strong.

It is this three-fold 'balance' that sets the five United States Individualized Tires in a class apart.

Since our 'balanced' tires began to be "felt on the mar-ket" last fall, the sales of United States Tires have in-creased steadily month by month up to the recent highest increase of 354 per cent.
